

Remove Labour... ...Remove Cost

- **Low cost route to Full Automation**
- **Fits existing or new flowrappers**
- **Pay-Back measured in Weeks**
- **Continuous smooth operation**

Supplementing your existing packaging machinery with an automatic product loader has possibly the shortest pay-back period of any equipment purchase. In fact, with our special payment terms, you could be buying it for less than you would pay the operators it's replaced - now that is a fast pay-back!

Products are in continuous motion so the packing process runs smoothly, more efficiently and faster. It runs 24 hours a day, 7 days a week without taking a break, or a holiday, or calling in sick. Reducing your labour costs and increasing your efficiency is essential in these days of change, financial constraint and increased competition. Contact [midasmotion](http://www.midasmotion.com) and let us show you how to automate on a budget!
